Flag: Follow up

Hi Ana,

My company (Lyondell Chemical Company) submitted a public comment on 1/21/20 regarding the Risk Evaluation for N-Methyl-2-pyrrolidone. Following submission, we identified an error in the cover letter (dated 2019 rather than 2020). Upon identifying this error, we contacted the regulations.gov help desk and they advised us to resubmit with a header explaining the issue. We did as advised: see attached and the tracking numbers below for both submission.

Initial Comment Tracking #: 1k4-9ekh-rhn6

Follow-up Comment Tracking #: 1k4-9ekh-jf9b

As we've yet to see our comment published in the docket, we were advised by the help desk on Monday, 1/27/20, to contact Stan Barone. He responded and I believe he said he'd forward the issue to you, so please forgive me if you've already been made aware.

Currently we are seeking confirmation that our comment will ultimately be published in the docket and if there's any further assistance we can provide so that the cover letter accurately represents the date of submission.

Thank you,

Wade Barranco, PhD, DABT
